Basic research on development of convergence curriculum for fosterin

I. Convergence Concepts and Issues

- The trend of terms such as consolidation, integration, convergence, and consilience, which have emerged as major topics in society needs to 'communicate among various fields'. It is clear that the subdivision of science may have succeeded in producing specialized knowledge in its own domains, but it has not provided use of more creative knowledge. For this reason, terms such as "convergence across boundaries" such as convergence, complexity, words in society as a whole.

- In the case of Kim Hyangwon and Nam Yong-hyun (2013), the linguistic meaning of the term related to fusion is as follows.

1) The convergence of English emphasizes the concept of convergence, which means 'to combine with one another'.
